

Lifeco

Pressure switch

Model: LF/JY

Application

Lifeco's pressure switch is designed to detect the flow of water through pressure variation in an automatic water sprinkler system. It is usually mounted on the outlet of the retard chamber and sends a signal to control panel identifying flow of water in the system.

Technical parameter

Leak test (Mpa)	Rated working pressure (Mpa)	Operating pressure (Mpa)	Contact Capacity	Joint Thread
2.4 Mpa	1.2 Mpa	<0.05 Mpa	AC 220V 5A DC 24V 3A	R1/2
